

Drain Cleaning Services

Have you ever Thought about what goes down Your Drains on daily basis?

There are numerous reasons that contribute to the blockage of drains which may include Dirt, Hair, Soap and Grime to disposed sanitary pads and undissolved tissues. Unfortunately, everything has a breaking point, and if your drains aren't properly cleaned on a regular basis, you could experience slow drainage, or worse, a severe clog that could wreak havoc on your sewage lines & pipes causing Severe Operational interruptions. The Decomposing Organic Matter also acts as a substrate for Microbes thus endangering the Preservation of Health of the Occupants of the Building. Good Sanitation is after all- Not only about the Physical Facility or Privacy- The real neutralization of the threat to health is assured only upon proper disposal & ensuring that the facility itself does not act as a risk to Health Security. .

Benefits of regular Drain cleaning in Commercial Premises

Keeps the Drain Free from Clogging- Eliminates any Operational Interruptions.

Keeps the Drains Free from build-up of Harmful Pathogens-Preserves the Health Security for the Occupants of the Building & Enhances Hygiene Security.

Rids Foul Odour & Improves Chemical Composition of Air Quality – Ensures Fresh Smelling Washrooms.

Reduces / Eliminates Expensive Repairs by Improving Life Span of your drains – Lowers Maintenance Cost.
